Standard Table Numbers

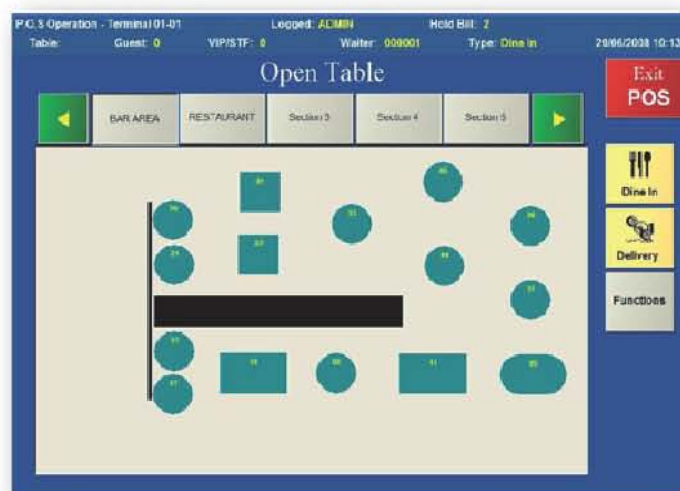

Table Layout Plan

Hanis
POS

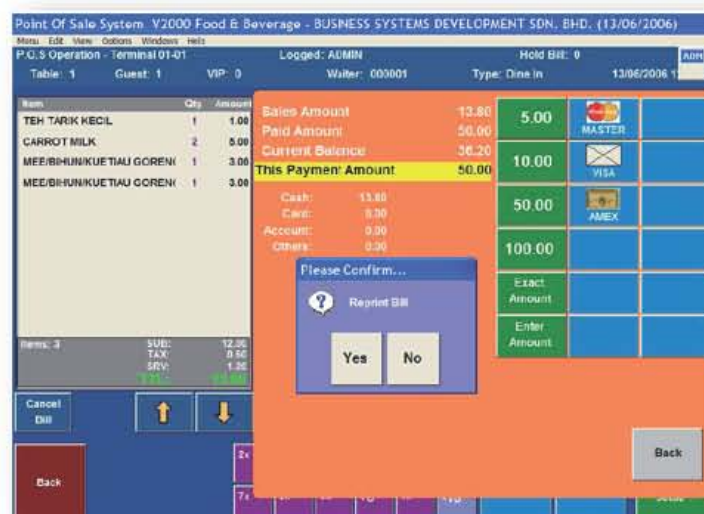

- Supports types of selling prices such as retail and wholesale
- Batch numbers and expiry dates can be activated for individual items for specialized businesses such as Pharmacy.
- Various report options such as locations, departments, products or groups. For each individual report, the selection varies according to the many possible uses of the reports.
- This system can be integrated directly to Ace Sales Invoicing or Sales Order Systems for immediate update of stock items sold without having to post again. When integrated to these systems, the quantity on order and sold before actual update are reserved by the system to give an accurate stock quantity balance.
